

Whitepaper

FEG

Feed Every Gorilla
Bringing DeFi Together

FEG Token is redesigning the way decentralized finance (DeFi) is structured. FEG Token is focused on reshaping and evolving how DeFi works completely while delivering the most robust ecosystem ever designed for DeFi's much-needed advancements.

Let's Feed Every Gorilla and Be the Future of DeFi!

The Puzzle

Shaping the future of DeFi—one Ape at a time!

Since January 2021, FEG ("FEG Token," "FEGtoken") is here to unify the incentives and interests of everyone in the decentralized finance (DeFi) space. DeFi creates transparent, efficient, and secure markets. A team of renowned developers was not interested in creating another memecoin or the latest pump-and-dump scheme after they had enough of witnessing rug pulls. Instead, they had an idea to create a new kind of ecosystem that overcomes transactional complexities, outrageous fees, and solving problems surrounding fairness and privacy.

There is a real appetite from investors to back the best and brightest decentralized applications (DApps) that are offered while the space offers exponential upside and high-yield opportunities for investors. There are challenges around inter-chain operability and accessibility, sustainable liquidity on decentralized exchanges (DEX), and risks to capital. The dynamism of DeFi provides a decentralized launchpad for applications in DeFi and Web 3.0 (also known as the Semantic web) to provide critical liquidity for projects and opportunities for investors. However, unsavory events can deter new participants and starve innovators of crucial working capital.

The FEG ecosystem supports long-term DeFi adoption by consistently working to produce and support innovation while increasing accessibility and opportunity to investors and developers. Up until 2009, the world of traditional finance had maintained an unchallenged monopoly on the exchange of financial value for goods and services. Traditional finance is strongly influenced by centralized institutions that extract value through the distribution, remediation, and settlement of transactions. The FEG ecosystem makes DeFi safer, more accessible, and more rewarding with a circular ecosystem that aligns incentives for holders, traders, and developers. FEG is committed to creating opportunities in the crypto and DeFi spaces that can be leveraged by millions of people globally to earn passive income.

Core Brand Values

1. Breakthrough Innovation

FEG lives at the bleeding edge of innovation. The community is a market leader—not a follower. FEG understands that a culture of breakthrough innovation is uncomfortable and sometimes difficult; nonetheless, the community thrives in this atmosphere.

2. Integrity and Transparency

FEG has a reputation for being openly disdainful of scammers. This disdainfulness is built into the contracts. To that end, FEG ensures the community has all the information needed to feel confident with high levels of trust in the community leaders and developers as they invest within the FEG ecosystem.

3. Leveraging the Power of DeFi

DeFi offers tremendous opportunities for people around the world to take control of their financial future. The FEG community is deeply committed to helping other fellow community members—whoever and wherever they are. FEG does not discriminate.

The Puzzle

4. Passion for Learning

FEG is passionate about understanding the crypto and DeFi spaces. The FEG community will always be learning, questioning, and broadening their horizons (both personally and professionally) as one united community. Education is paramount, and there is never a time to stop learning and sharing knowledge

5. Giving Back

FEG cares and stands proudly with charitable organizations. FEG understands that love and compassion go a long way in striving to make the world a better place for all. Moreover, FEG will strive to be a leader in ensuring that decisions and actions in the crypto and DeFi spaces benefit society at large.

6. Diversity and Inclusion

FEG understands the benefits of fostering a diverse and inclusive community, especially in the cryptocurrency and DeFi spaces. The community accepts and welcomes people from different walks of life along with other crypto communities in the DeFi space. Diversity is recognized as a strength that promotes creativity and renewal. Inclusion is a journey that will require effort, focus, and determination to accomplish meaningful change within society.

Core Brand Personality

1. Professional and Respectful

FEG will hold strong to the pillar of professionalism and respect for people. Even if community members and leaders must be firm about a topic, they shall consistently strive to be respectful. Every community member and investor shall feel appreciated, heard, respected, and valued.

2. Edgy and Rebellious

FEG's attitude is rebellious—in a positive way. The community will come across as edgy; however, this is because the community is on the edge... of DeFi.

3. Fun and Lighthearted

Even though the focus of the project is to accomplish serious breakthrough innovation in the world of crypto and DeFi, the community tries not to take themselves too seriously and always enjoy fun and lighthearted communication as a team—and as one united community.

The Ecosystem

FEG Token was launched fairly to **Feed Every Gorilla!**
Community-driven.
Built to succeed.

FEG is focused on reshaping and evolving how decentralized finance (DeFi) works completely while delivering the most robust ecosystem ever designed to support DeFi's much-needed advancements.

The main idea behind FEG Token is to provide a decentralized transaction network, which operates on the Ethereum blockchain (ERC-20) and the Binance Smart Chain (BEP-20). The path forward for FEG Token is determined by market fluctuations, but the model it runs on begs FEG Token to succeed.

FEG Token is a hyper-deflationary token with a maximum circulating supply of 100Q (quadrillion) on both the Ethereum blockchain and the Binance Smart Chain that involves an inaccessible burn wallet. Depending on each holder's percentage of ownership, a 2% transaction tax is distributed among all holders—this includes the burn wallet, which is essentially a holder that collects more tokens over time as transactions occur. As the circulating supply decreases, the scarcity of the token increases. This inversely proportional relationship constitutes a supply and demand model. There is no limit as to how many tokens can be burnt. Without a burning limit, holders get to enjoy a never-ending cycle of passive income with positive price pressure!

FEG Token is the governance token of FEG Exchange ("FEGex"), our cross-chain centralized exchange / decentralized exchange (CEX/DEX) where tokens can be swapped, staked, added to liquidity pools, or fWrapped. FEGex is revolutionary.

fWraps provide an additional passive income stream. Hold a fWrap asset and receive more of that fWrap asset over time. The original cryptocurrency can be ADA, DOGE, XRP, LTC, USDT—and much more! Unwrap back into the original cryptocurrency asset at any time. Earn more of your favorite cryptocurrencies passively while you sleep. (Seriously.)

FEGtrack is a mobile and web application that enables users to track their FEG rewards and dollar-value balance. The application is continuously improving as FEG Token transforms the DeFi space.

The Ecosystem

The Pan African Sanctuary Alliance (PASA) is FEG Token's first charitable partner, and the FEG Token team matches the first \$750.00 (USD) of donations given by the community each month.

FEG Token has also created the world's first perpetual charity cryptocurrency wallet, a charity pool that will earn rewards perpetually for donation purposes, powered by frictionless yield.

There are several strategic partners within the FEG Token ecosystem, each with unique use cases. The ecosystem leverages the partners to grow and become more diversified.

SmartDeFi is the latest innovation created by FEG Token's lead developer, FEGrox. It rewrites DeFi to make it much more secure (rug-proof), more efficient (improved routing with reduced gas fees), and better rewards investors through frictionless yield. Tokens utilizing SmartDeFi manage their liquidity, removing the need for exchanges to host liquidity pools. Additionally, SmartDeFi is 100% asset-backed, which provides guaranteed value. ROX Token is the "model home" of SmartDeFi.

FEG Token's vision advances further into the cryptocurrency space by releasing innovative products, such as non-fungible tokens (NFTs) and gaming. The sustainability of FEG Token is of utmost importance to the community and its leaders.

Contract Addresses:

Ethereum blockchain (ERC-20): **0x389999216860ab8e0175387a0c90e5c52522c945**

Binance Smart Chain (BEP-20): **0xacfc95585d80ab62f67a14c566c1b7a49fe91167**

Tokenomics

The governance token. For all.

FEG Token is a hyper-deflationary decentralized finance (DeFi) token that operates on the Ethereum blockchain (ERC-20) and Binance Smart Chain (BEP-20). FEG Token was built to succeed.

Each chain was launched with an initial 100Q (quadrillion) tokens. 50Q on each chain was immediately burnt to kick-start FEG Token's deflationary tokenomics. 2.00% of every transaction (buy, sell, or transfer) is taxed and distributed between all FEG Token addresses on that particular chain. Over half of this tax is sent to an inaccessible burn address ("black hole") and the rest is distributed to holders, incentivizing holders to hold and decreasing the circulating supply over time. These rewards are earned immediately and automatically into holders' wallets.

FEG Token is fully decentralized. Ownership was renounced at launch and all communications, developments, and marketing campaigns are planned and performed by members of the community.

FEG Token was audited and verified by Solidity Finance*. Through this process, FEG Token was proven to have no backdoors or distributed denial-of-service (DDoS) attack routes.

* Visit <http://solidity.finance/audits/FEG> for additional details.

FEGtoken.com | **FEG**ex.com | **FEG**rox.com

FEG Exchange (FEGex)

Redefining DeFi!

FEG Exchange (FEGex) (<https://fegex.com>) is an **all-in-one exchange** that is multi-chain and running on the Ethereum blockchain and Binance Smart Chain.

It was built from the ground up with custom coding that is specifically designed to resolve major issues with other popular exchanges surrounding DeFi tokens.

FEGex has a bridge that makes cross-chain swaps possible between the two blockchains (ERC-20 and BEP-20). FEGchart allows for advanced charting and provides a deep dive into technical analysis.

- **Listing Process**

Auto-listing enables any token to list on FEGex, add locked liquidity, and create trading pairs.

- **Trading**

Both Ethereum blockchain (ERC-20) and Binance Smart Chain (BEP-20) tokens can be traded on FEGex. The number of trading pairs listed on the platform will increase **exponentially** over time. Some of the breakthrough features of trading on FEGex include:

- **SmartSwap**

Deposit tokens into the SmartSwap contract to greatly reduce swap and gas fees. When using SmartSwap, your trades are not subject to the usual taxes on deflationary tokens, and routing is optimized. A huge win for swing traders.

There will not be a burning of the typical 2.00% of the transaction when trading alongside SmartSwap. All of the sells and swaps (standard and internal) incur sell fees; internal transactions increase the volume for staking rewards. Traders can only trade within the pool that the SmartSwap is occurring inside of. Traders can still swap via the standard method while holding assets inside of the SmartSwap system.

- **Crypto-Back Rewards Program**

Traders receive a portion of their purchases back in the form of cashback. All sells (on all pairs) on FEGex will have a 0.08% fee that will fund the Crypto-Back Rewards Program. If a purchase is made on any pair on FEGex, there will be a set percentage of the purchase amount given back to the purchaser. This amount will be a claimable cashback amount in the form of fETH or fBNB. The cashback balance will grow automatically as the purchases use the exchange.

- **Front-running bot protection**

FEG Token's contract code is engineered to eliminate front-running smart contract bots.

- **Auto-slippage**

Worrying about setting the slippage before transacting is a thing of the past—even on deflationary tokens, where slippage requirements vary.

FEGstake

Seamlessly earn **passive income** while **contributing** to the ecosystem!

Staked FEG tokens are held securely in the FEG Token staking contract. **Stakers are rewarded a share of 0.12% of the dollar value of all sell transactions that occur on the exchange (across all pairs) in the form of fBNB or fETH, depending on which chain was utilized to stake.** These rewards are divided and distributed to stakers **automatically**, based on the percentage of the staking pool each staker owns. As the trading pairs and trading volume increases on FEGex, FEG Token staking rewards will increase dramatically.

There is also an auto-conversion of the FEG transaction rewards equivalent to what would have been received without staking.

It is important to note that there is no impermanent loss with staking, and participants can unstake their FEG tokens at any time. The usual 2.00% FEG transaction tax is charged when staking and unstaking.

Every **sell** transaction on **FEGex** will **provide 0.12% of the sell fee from every token launched and paired with the following base pairs** in FEGstake v2:

- **FEGbsc:** fBNB, fUSDT (BEP-20), fBTCB (Binance-pegged Bitcoin)
- **FEGeth:** fETH, fUSDT (ERC-20), fBTC
- Note: All other base pairs will use 0.12% of their sell transaction fee to buy FEG and send it directly to the burn address in one transaction.

SmartDeFi is an unruggable launchpad for tokens, allowing each token to be its own DEX with multiple integrated reward systems built on both the Ethereum and Binance Smart Chains.

- All tokens that launch on SmartDeFi will be base-paired against either ETH on the Ethereum blockchain or BNB on the Binance Smart Chain
 - Every **sell** transaction for **every token launched** on **SmartDeFi** will **provide 0.12% of the sell fee to FEGstake v2 rewards** in the form of fETH or fBNB, based on the respective chain. SmartDeFi will only allow base-pairing to these two pairs.
 - **Every token that launches** off of the **SmartDeFi** platform **will use 0.50% of its sell transaction fee to buy FEG Token and send it directly to the burn address in one transaction**
- The rewards against fETH and fBNB base pairs will then be divided and distributed to FEG Token stakers, based on the percentage of the staking pool each staker owns.

FEGstake

- The fWrap rewards in FEGstake v2 will be **distributed** by the deployer **when someone withdraws their rewards from the pool and the following thresholds are met:**
 - 0.2 fETH or 0.2 fBNB
 - 100 fUSDT
 - 0.005 fBTC(B)

Stake FEGbsc and earn:

- FEGbsc reflections (added directly into your staking pool)
- fBNB + reflections
- fUSDT + reflections
- fBTCB + reflections

Stake FEGeth and earn:

- FEGeth reflections (added directly into your staking pool)
- fETH + reflections
- fUSDT + reflections
- fBTCB + reflections

Notes:

- There is a 2.00% tax moving FEG Tokens into and out of staking.
- There is no impermanent loss with staking!
- There is a one-time activation fee per wallet for staking in FEGstake v2.
 - 0.02 BNB (on BSC) and 0.003 ETH (on ETH); the fees will be immediately refunded in the form of TRY to your wallet.
 - For now, as of August 25, 2021, stakers will get FEG returned upon activation in the amount of 0.003 ETH as the TRYeth lottery function is interrupting the staking flow
- The FEG Stake Shares (FSS) represent your FEG Token shares inside of FEGstake v2 at a 1:1000 ratio.
- **Stakers should NOT move the FSS tokens WITHOUT UNDERSTANDING THE RISKS since it is a fundamental component of the unstaking process!**
 - You risk losing your staked FEG if FSS tokens are sent to an incorrect address.
- You can send the FSS tokens to another wallet address.

FEGstake

- The new wallet containing the sent FSS tokens will now have ownership of the staked FEG balance inside FEGstake v2. FEG tokens are still subject to the 2.00% tax upon removal from staking in the new wallet.

- FSS (ETH) contract address:

0x4a9D6b95459eb9532B7E4d82Ca214a3b20fa2358 (18 decimals)

- FSS (BSC) contract address:

0xF8303c3ac316b82bCbB34649e24616AA9ED9E5F4 (18 decimals)

BONUS REWARDS: FEG Token holders who stake will still receive their portion of the FEG Token community distribution from the 2.00% tax in addition to the 0.12% rewards.

- Frictionless rewards will be distributed as FEG and sent directly into staking pools.

The FEGstake rewards in FEG and fWrapped tokens will accumulate rewards before being claimed.

With the FSS staking system, any upgrades to the staking version will NOT require removing staked tokens and re-stake.

Staking TRY:

- The TRY staking pool receives 5.00% of sales on its own pair.

Staking of all other pairs (excluding FEG and TRY):

- All future tokens:
 - 0.20% staking fee (optional)

Project owners may choose not to have a staking pool for their own project and waive the 0.20% fee entirely or allocate the 0.20% as a Development fee to be received by their team.

Liquidity

Provide liquidity. **Be rewarded.**

Holders that add FEG into liquidity, or **liquidity providers (LP)**, will allow others to purchase FEG using the FEG tokens that are placed into liquidity. As a result, these holders will be rewarded in fBNB, fETH, and/or fUSDT, depending on the chain that liquidity is being provided.

1-Sided Liquidity

Where 1-sided liquidity is enabled, there is no need to pair fBNB, fETH, or fUSDT to participate in the liquidity pools. The maximum 1-sided liquidity added per transaction is equivalent to 1.00% of the pool's size. For example, if the pool contains 100T (trillion) FEG, then a maximum of 1T FEG can be added at a time.

Liquidity pools are subject to impermanent loss as investors buy and sell FEG tokens. Compensation for this will be in the form of fBNB, fETH, and/or fUSDT, based on the chain that liquidity is being provided.

Liquidity providers receive a share of 0.20% of all sells on the pair they provide liquidity on, frictionlessly.

2-Sided Liquidity

With 2-sided liquidity, there is an optional pairing to either fBNB, fETH, fUSDT at a matching USD value. This option is available for all pairs on the exchange. The maximum 2-sided liquidity per transaction is 49.00% of the total liquidity pool.

What about liquidity with other tokens besides FEG?

All other tokens listed on FEGex will have the option to designate 0.20% of their sell transaction fees to their LP Rewards or choose to bypass the staking option and designate 0.20% of their sell transaction fees to their marketing or development wallet. LP Rewards benefit each token pool, based on the percentage of ownership.

- FEG Token liquidity providers get 0.20% of sales in their own pool and distributed, based on the percentage of ownership in the pool.
 - Rewards are received in fETH, fBNB, or fUSDT, based on the pool liquidity is provided.
 - Frictionless rewards in FEG will also be received, based on the percentage of ownership inside the liquidity pool (varies with impermanent loss) and added directly to the provided liquidity amount inside the pool.
- 2.00% tax applies when moving FEG into and out of liquidity pools.
- 2-sided LP - FEG Token paired with fETH, fBNB, or fUSDT
 - Maximum 2-sided liquidity per transaction is 49.00% of the total liquidity pool.
- Subject to impermanent loss
- Flash Loan-safe - There is a whitelist system to safeguard against attacks and exploits.

All future tokens listed on FEGex will have a designated 0.20% sell transaction fee that rewards its own pool and is distributed, based on the percentage of ownership in the pool.

fWrap

Wrap your favorite cryptocurrencies, and **earn more** of them **passively!**

Wrap your favorite cryptocurrencies and immediately start earning more of them. Not looking to wrap your FEG? No problem! You can wrap your ADA, DOGE, XRP, LTC, USDT—and more. You can unwrap back into the original cryptocurrencies whenever you desire.

You pay a 1.00% tax when wrapping or unwrapping your cryptocurrencies. **There are no additional risks involved with fWrapping and no impermanent loss.**

1.00% of every transaction (buy, sell, or transfer) that takes place during the fWrap process (including the fWrap process within the SmartDeFi system) is immediate and automatically distributed between holders of that fWrap. **This provides an excellent annual percentage yield (APY).**

Base pairing is imperative to the fWrap process. Base pairing means any new tokens that list on FEGex (including within the SmartDeFi system) will have the option of adding liquidity pairs between the newly-listed token choices. With the additional pairings to these tokens, it will allow anyone who owns the pairing tokens to bring them to FEGex and fWrap them to earn their portion of the frictionless 1.00% distributed to the pools from transaction fees on the exchange that include that token as a base, including transactions within the SmartDeFi system.

Trading between FEG and one of the fWraps will be possible only if someone adds liquidity to set up the pair.

You can create your fWrap and earn frictionless rewards of ANY token with the fWrap Deployer!

Every **buy and sell** transaction on FEGex, as well as on SmartDeFi, will incur a frictionless 1.00% conversion fee from **every token ever listed/deployed**; this fee is awarded to all fWrap holders, based on the percentage of ownership in each respective pool.

These rewards originate from wrapping/unwrapping all fWrapped base pairs during the buy/sell process on FEGex, as well as SmartDeFi.

Example:

Wrapping: ETH + 1.00% fee → fETH

Unwrapping: fETH + 1.00% fee → ETH

All tokens that choose to list on FEGex will have the option of pairing against any fWrapped base pair found on fegwrap.com or choose to create their own fWrapped base pair by utilizing the fWrap deployer.

It is NOT advisable to fWrap tokens with Reflect Finance (RFI) tokenomics (tokens that are rewarded in themselves from a transaction tax, such as FEG).

SmartDeFi will only allow base-pairing against fETH and fBNB.

With the additional pairing to new or existing base pairs by tokens listing on FEGex, all transactions in each respective base pair will allow anyone holding any fWrapped tokens to earn rewards passively. These rewards are in the same token that is fWrapped. For example, if you fWrap BTC → fBTC, your rewards will be in fBTC.

There is a 1.00% tax that is redistributed to the fWrap pools when sending fWrapped tokens to another wallet.

SmartSwap

A swing trader's paradise!

Swing trade without incurring taxes! The 2.00% tax on FEG will be waived when trading inside (via the internal balance) of SmartSwap. There is a 2.00% tax on FEG (and any other RFI token) if you put them into and pull them out of SmartSwap. There is a 1.00% tax on fBNB, fETH, fUSDT, and any other fWrapped token when placed into or pulled out of SmartSwap.

Please note that frictionless reward tokens do not receive rewards while inside the SmartSwap system. The frictionless rewards are not given for the token amount in the internal balance. The internal balance is not seen by the contract for the distribution of rewards. For this same reason, it mitigates the 2.00% tax (for FEG) when trading inside of SmartSwap.

You can only trade within the pool you are "SmartSwapping." Gas fees have been reduced up to a whopping 40.00% inside of the SmartSwap system!

Any movement of fWrapped tokens will have a 1% fee; this includes wallet-to-wallet transfers. You may still use the standard swap while holding assets inside of the SmartSwap system; there is a regular balance and an "internal balance."

All internal buy and sell transactions will still incur the standard buy and sell transaction fee and reward the appropriate pools (staking, LP, etc.).

Peer-to-Peer (P2P)

Send and receive funds **discreetly**. We respect your **privacy**.

Send and receive funds without the whole world knowing - that's your business. You can send and receive any token or base pair that has SmartSwap capability on FEGex discreetly. The receiving wallet is not revealed in the Tx hash.

It is not a direct wallet-to-wallet transaction. Instead, the transaction is routed through a smart contract. This provides enhanced privacy with encryption.

Inside the P2P system, there are transaction taxes. There is a 0.50% tax when sending FEG, which will be sent to the burn wallet. There is a 0.30% system fee for any fWrapped token that will be used for high-end server hosting, IT security firm payment, and further development of the FEG Token ecosystem. Gas fees for P2P should be minimal; all previous transaction fees have been averaging only \$0.06.

- There is a 2.00% tax on FEG Token when moving the tokens into and out of SmartSwap.
 - External balance + 2.00% tax → Internal balance
 - Internal balance + 2.00% tax → External balance
- There is a 1.00% tax on all fWrapped tokens when moved into and out of SmartSwap.
 - External balance + 1.00% tax → Internal balance
 - Internal balance + 1.00% tax → External balance
- P2P transfer taxes (separate from taxes moving into and out of SmartSwap)
 - 0.50% tax when sending FEG
 - 0.30% System fee for any fWrapped token

Swap-to-Swap (S2S)

A SmartSwap Feature.

Swap-to-Swap (S2S) allows for moving of fWrapped base-pair (fBNB, fETH, fUSDT, etc.) between SmartSwap contracts (e.g., FEG/fBNB → fBNB moving → TRY/fBNB)

- There is a 1.00% tax on all **fWrapped tokens** when moved into and out of SmartSwap.
 - External balance + 1.00% tax → Internal balance
 - Internal balance + 1.00% tax → External balance
- **Swap-2-Swap fee:** (separate from taxes moving into and out of SmartSwap)
 - 0.30% Systems fee for any fWrapped token
- **Before & Utilizing S2S Fees Explained:**
 - **Before S2S** (fWrap already inside SmartSwap): FEG/fBNB to TRY/fBNB
 - 1.00% fee moving fBNB from Internal FEG/fBNB balance to External Balance
 - 1.00% fee moving fBNB from External Balance to Internal TRY/fBNB Balance
 - Total 2.00% fees
 - **Utilizing S2S:** (fWrap already inside SmartSwap): FEG/fBNB to TRY/fBNB
 - 1.00% fee moving fBNB from External Balance into FEG/fBNB SmartSwap
 - 0.30% fee Swapping fBNB from Internal FEG/fBNB SmartSwap to Internal TRY/fBNB SmartSwap → Purchase TRY inside of SmartSwap

Smart Rising Price Floor

Prices. **Automated.**

Pairs on FEGex have a setting to automatically raise their price floor by setting sell percentages. There is a gasless and streamlined approach compared to other options available from competitors. A percentage of each sale remains in the liquidity, which raises the price automatically after every sale without any gas cost.

Many competitor tokens already have something similar in place; however, their system is set up where there is an automatic buy with 2.00% of each sale. This process takes up to five (5) steps to complete on competitors' infrastructures. With FEGex, the process requires ZERO (0) steps since it is built-in. (Neat, right?)

SmartDeFi

DeFi - the way it is **supposed** to be. Life is DeFi!

SmartDeFi is a template for a new generation of DeFi projects, which makes it impossible to rug and unnecessary to use exchanges, such as Uniswap or PancakeSwap, for hosting liquidity. It allows all swap sites to fully integrate the trading of a token while using the token's liquidity pool.

All of the code for a token's tokenomics and swaps on the DEX is built into the token itself. We call these "on-token swaps." You simply need to provide a user interface (UI) for the token, configure its contract functions, and you can trade it.

People around the world will be able to build UIs for tokens that use this technology. Anyone can deploy their own SmartDeFi token with FEGdeployer.

Every SmartDeFi token is fully backed by its base asset, guaranteeing the tokens' baseline value is secured from suffering loss. Base assets are what assets the tokens are traded against (for example, fBNB/fETH). A set percentage of every buy/sell is given to the asset-backing pool which is secured inside the SmartDeFi tokens' smart contract. This results in a perpetual increase of the SmartDeFi tokens' baseline value, resulting in the formation of a baseline value that can never decrease. (Seriously!)

The asset-backing can be recovered instantly by burning SmartDeFi tokens for their share of asset-backing. When SmartDeFi tokens burn for their backed asset, it creates a "black hole" that burns more and more tokens automatically and effortlessly over time. Burnt tokens forward their backing to the remaining tokens, increasing the backing per token faster. This guarantees that every SmartDeFi token will always have value, regardless of the market price!

Since all SmartDeFi tokens are based on fWrap technology, their market price even rises when there is zero (0) volume. SmartDeFi "DeFi" the laws of physics! When any tokens are sold, the baseline value goes up instead of down. SmartDeFi also helps to eliminate pump-and-dump schemes. With the baseline value being transparent, buyers know what the risk ratios are even before trading.

SmartDeFi

DeFi - the way it is **supposed** to be. Life is DeFi!

Asset-Backing Example

How the asset-backing will increase!

(Figures are based on the USD value of BNB not changing and a supply of 1,000 ROX. If BNB increases over time, then results will yield more.)

5.00% of volume allocated for backing

Every \$1m volume adds \$50,000 to asset-backing

RESULTS based on example:

After \$1m volume:

$\$50,000 / 1,000 = \50 per token total backing

After \$100m volume:

$\$5,000,000 / 1,000 = \$5,000$ per token total backing

After \$1b volume:

$\$50,000,000 / 1,000 = \$50,000$ per token total backing

If volume is \$10m per day for 1 year:

$\$182,500,000 / 1,000 = \$182,500$ per token total backing

If volume is \$1b per day for 1 year:

$\$18,250,000,000 / 1,000 = \$18,250,000$ per token total backing

If volume is \$1b per day for 10 years:

$\$180,250,000,000 / 1,000 = \$180,250,000$ per token total backing

SmartDeFi

SmartLend - Powered by SmartDeFi

Banking in DeFi! The most secure lending protocol ever created.

Users will be able to use any SmartDeFi token as collateral to take out loans on the token's baseline value—without having to sell them or having to burn them. Simply use the SmartDeFi loan function to place the SmartDeFi token into collateral inside the SmartDeFi token contract.

Borrowers will be instantly given the baseline value for the tokens they provided. All tokens placed into collateral are removed from the circulating supply and considered burnt until they are recovered by loan repayment.

All loans are open for an initial 30-day period, with a base interest rate of 1.20% APR. The funds come from the baseline value at the start of the loan. Loans are considered paid when borrowers repay the difference in the baseline value from the time they took out their loan, including their initial loan amount.

Borrowers must extend or repay their loan within 30 days or their collateral will be considered burnt. If borrowers need more than 30 days to repay their loan, they can get a 30-day extension by burning 0.1% of their collateral. The best part about SmartLend is that this does not negatively impact the baseline value!

Users have access to their baseline value at all times and the rate is determined by the market. No oracles are needed; the price comes directly from the baseline. No third party is needed; nothing can be manipulated externally to exploit the code. Only internal functions are necessary.

SmartLend is 100% secured within SmartDeFi! SmartLend is the first lending protocol where the funds and data for ratio calculations are hosted inside the same place, making it the most secure lending protocol ever created.

This means that borrowers can now have access to their SmartDeFi token's baseline value without having to sell it. This is perfect for emergencies or taking advantage of buying into the launch of a new token, without having to sell assets. Borrowers have the freedom and can also treat their baseline value as a banked asset.

Welcome to decentralized banking in DeFi!

ROX Token

The “**model home**” of SmartDeFi.

ROX Token is a revolutionary token and is the world's first SmartDeFi token. It launched with a total supply of 1,000 ROX on each chain (ERC-20 and BEP-20). 1.00% of every transaction (buy, sell, or transfer) will be distributed to holders immediately and automatically.

ROX Token has all of the transformative features of FEGex built into itself along with SmartSwap, Auto-Routing (auto wrap/unwrap)—and more!

FEGex hosts ROX Token, which appears in the list of tradable tokens and can be traded the same way as other tokens. ROX Token is the “model home” of SmartDeFi.

Contract Addresses:

Ethereum blockchain (ERC-20): **0x378c77C5379cA07BBB5B3506c08a1C769dEC91c2**

Binance Smart Chain (BEP-20): **0xa3D522c151aD654b36BDFe7a69D0c405193A22F9**

- **ROX Buy Fee = 6.00%**
 - 5.00% for Asset-Backing
 - Asset-Backed fWrap reflections are redirected to the ROX Token liquidity as a Smart Rising Price Floor.
 - 1.00% is rewarded to ROX holders (0% fee if holding at least 0.001 ROX)
 - If you hold at least 0.001 ROX, you bypass reflect fees (“feeless”) on receiving any SmartDeFi token.
 - The token recipient must be the holder of at least 0.001 ROX to bypass the 1.00% transfer fee for ALL SmartDeFi tokens.
 - If you hold at least 0.001 ROX and you withdraw SmartFunds out of SmartSwap, you will receive the total amount you are withdrawing (e.g., withdraw 500 from SmartFunds, and you will get 500 tokens).
 - Excludes Swap and Burn Addresses

ROX Token

The “model home” of SmartDeFi.

- **ROX Sell Fee = 6.75%**

- 5.00% for Asset-Backing
- 1.00% is rewarded to ROX holders (0% fee if holding at least 0.001 ROX)
- 0.50% buys and burns FEG
- 0.12% FEGstake fee
- 0.10% Smart Rising Price Floor fee
- 0.03% System fee

FEGtrack and FEGstats

Witness **mooning**! Track your **rewards**.

Holders of FEG can track their FEG tokens using the FEGtrack application, which is available on the **App Store** or on **Google Play**.

FEGtrack is also available on desktop computers via a web app (<https://fegtrack.app>).

Anyone in the FEG ecosystem can take advantage of FEGstats to view holdings in one place as well as view current data and prices.

Data is pulled from the blockchain using only public wallet addresses, making it completely secure.

The following are several features that are available within FEGtrack:

Real-time FEG balance and valuation Live burnt/circulating token counter Multiple wallet addresses

Charted market data via FEGcharts (powered by TradingView)

Rewards forecasts Links and information

Fees

Let's be transparent.

FEGex Fees (for FEG)

Buy Fees

- 0.10% allocated to buying and burning FEG

Sell Fees

- 0.10% allocated to buying and burning FEG
- 0.20% LP Rewards fee
- 0.12% FEGstake Rewards fee
- 0.08% Crypto-Back Rewards System fee*
- 0.05% System fee

Total = 0.10% buy transaction fee
0.55% sell transaction fee

*At the time of publication, the Crypto-Back Rewards System fee is being redirected to FEGstake Rewards.

FEGex Fees (for tokens that list on FEGex via FEGdeployer)

Buy Fees

- 0.10% allocated to buying and burning FEG

Sell Fees

- 0.20% LP Rewards fee (for the respective token)
- 0.35% Integrated FEG fees
 - 0.10% allocated to buying and burning FEG
 - 0.12% FEGstake Rewards fee
 - 0.08% Crypto-Back Rewards fee*
 - 0.05% System fee
- 0.20% Staking fee (optional)
 - The project leaders may waive the 0.20% staking fee as a whole
 - This leaves a total of 0.45% sell transaction fees
 - 0.25% of which goes towards the Integrated FEG fees
 - 0.20% to their liquidity pool
 - Note: Waiving the staking function does not remove the 0.12% fee towards FEGstake Rewards

Total = 0.10% buy transaction fee

AND

- 0.55% (waived staking fee) sell transaction fee

OR

- 0.75% (with staking fee) sell transaction fee

*At the time of publication, the Crypto-Back Rewards System fee is being redirected to FEGstake Rewards.

Fees

SmartDeFi Fees

Standard exchange fees for SmartDeFi tokens and custom fees set by project leaders (X):

Buy Fees

- X.XX% for asset-backing
- X.XX% allocated to rewarding token holders*
- 0.10% allocated to buying and burning ROX

Sell Fees

- X.XX% for asset-backing
- X.XX% allocated to rewarding token holders*
- X.XX% Smart Rising Price Floor fee
- 0.50% allocated to buying and burning FEG
- 0.12% FEGstake Rewards fee

*All reflection fees can be waived if the wallet has at least 0.001 ROX.

ROX Token Fees

Buy Fees

- 5.00% for asset-backing
- 1.00% allocated to rewarding ROX Token holders*

Sell Fees

- 5.00% for asset-backing
- 1.00% allocated to rewarding ROX Token holders*
- 0.50% allocated to buying and burning FEG
- 0.12% FEGstake Rewards fee
- 0.10% Smart Rising Price Floor fee
- 0.03% System fee

Total = 6.00% buy transaction fee

6.75% sell transaction fee

*All reflection fees can be waived if the wallet has at least 0.001 ROX.

Philanthropy

Spreading **goodness**. Making a **difference**. Being the **change**.

Pan African Sanctuary Alliance

The FEG Token community reached out to several wildlife organizations. The Pan African Sanctuary Alliance (PASA) was selected as a charitable partner. The FEG Token is proud to be one of PASA's main supporters. Check them out at <https://pasa.org>.

PASA has been fighting against illegal hunting while putting efforts into research, education, and emergency response regarding wildlife. The alliance has a strong passion and goal to protect those that are unable to protect themselves. PASA is the largest coalition of wildlife centers and sanctuaries across Africa. With a network of 23 member organizations in 13 African countries, PASA serves as a united coalition to fight, protect, and save humanity's closest relatives from the brink of extinction.

How much does PASA receive?

100% of the donations given by our community, plus the first \$750.00 (USD) is matched 1:1 by the FEG Token team every month.

Where to donate?

Donation Address: **0x542ECAb35F70003401D9aD6909d4A3dbe7282494** Donations are accepted in FEG, ETH, and BNB.

Perpetual Charity Wallet

FEG Token has created the world's first perpetual charity cryptocurrency wallet, a charity donations pool that will earn rewards perpetually, powered by frictionless yield. Combined with automated donations, this will mean that our charitable partners will receive a stream of uninterrupted donations, automatically, forever.

FEGtoken.com | **FEG**ex.com | **FEG**rox.com

FEGfaucet

Claim **free** FEG. Every day. **Forever**.

FEG Token feeds every gorilla in all parts of the world. Experience the FEGfaucet (<https://FEGfaucet.com>) and claim free FEG. Every day. Forever.

The FEG Token team donated 20T of their own FEG tokens to kick-start FEGfaucet.

The FEGfaucet is locked and only the frictionless rewards it generates can be claimed. Anyone can claim the rewards. Each time the rewards are claimed on a first-come, first-served method, the claimable amount resets to zero. Each wallet can claim from the FEGfaucet a maximum of once per 24 hours. You do not need to be a FEG holder to claim from the FEGfaucet.

The FEGfaucet will generate rewards and help to expand the user base exponentially! The hope is that FEGfaucet will one day be providing over \$20.00 (USD) of FEG every minute, which would be more than the monthly salary in several developing countries and be truly life-changing for many.
